

Call Center

Skype From Any Phone in the World

Make Skype calls from your cell phone, the nearest phone – any phone! Actiontec once again delivers a product that enhances your Skype experience. Before, you had to sit in front of the computer and wear cumbersome headsets for Skype calling. Now VoSKY Call Center takes the great sound quality and low cost of Skype calls and makes these features accessible everywhere, on any phone.

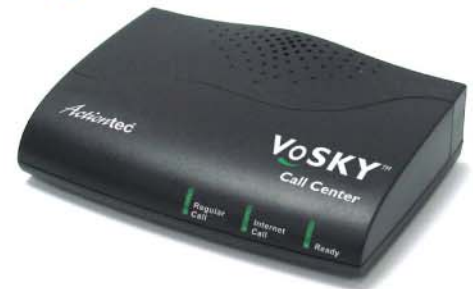

Key Benefits

- **Place Skype and SkypeOut calls from your home, mobile, office, or any phone**

Now you can grab any phone and make a Skype call! Call Center makes this possible by working like a mini phone operator. Once you've connected it to your computer and phone jack, you call Call Center from any phone and tell it which Skype contact you would like to call. Call Center then makes and transfers you to the free Skype call. For more convenience, you can also connect a phone directly to Call Center and just dial your contact's number from this phone. In either case, you can make Skype calls from any ordinary phone, wherever you are.

- **Receive incoming Skype calls to any phone**

Why sit in front of your computer all day to receive Skype phone calls? Why spend additional time there just so you can hear the headset or computer speakers ringing when you receive a Skype call? Call Center makes these problems a thing of the past. You can connect Call Center to a phone and hear an actual phone ring, loudly and clearly, when you receive a Skype call. In addition, Call Center will forward missed Skype calls to any phone number of your choice. Now you can be anywhere and still receive your important Skype calls.

- **Get notified on any phone when your Skype contact becomes online**

When you make Skype calls on the go, you're inevitably going to call someone who isn't online and available at that time. Call Center has an easy solution. If this scenario happens, you can choose to have Call Center call your cell phone, or any ordinary phone number of your choice, as soon as your Skype contact is online. Then you can instantly call your Skype contact again with the press of a button.

System Requirements
