

Conference phones for every situation

Konftel 200NI – digital conference phone with superb sound quality

A more versatile conference phone as it works with both analogue and ISDN/So connection. This exclusive and versatile conference phone is perfect for demanding meetings. Ideal for large and small meeting rooms – the Konftel 200NI can be extended with additional microphones.

KONFTEL FEATURES

- **OmniSound®** – crystal clear sound
- **Natural sound** – in both directions (full Duplex)
- **2 year guarantee**

KONFTEL 200NI FEATURES

- A sophisticated unit, simple to connect and use
- Can be connected to an analogue line (PSTN) or a digital (ISDN/So) line
- A digital connection gives optimal sound quality
- Keypad and clear, illuminated display
- User-friendly menu system
- Tape recorder output
- Expansion microphones and remote control as optional

Now you can hold a meeting anytime – regardless of distance and pressing schedules. Konftel makes telephone conferencing the ideal alternative, providing an opportunity to bring people together and hold spontaneous meetings to reach instant decisions. Konftel conference phones are all equipped with the unique OmniSound®-feature – optimal sound for totally natural, crystal clear communication.

Exclusive and versatile!

The best sound, maximum performance, sophisticated menu system and optional expansion microphones and remote control. The Konftel 200NI is a multi-functional unit designed to meet all audio conferencing requirements.

The digital solution for larger meetings

Connected to the digital network (ISDN/S₀) the Konftel 200NI provides optimal sound quality. Expansion microphones can be connected to the Konftel 200NI to provide superlative sound conditions in larger meeting rooms. The range increases from 30 m² to 70 m², i.e. more than double the area. The optional remote control adds further ease to meetings, allowing you to control all the Konftel 200NI functions such as the speed dialling buttons for the most frequently used phone numbers.

OmniSound® – crystal clear sound

Walk and talk freely around your room with consistently high quality sound. There is no irritating sound clipping, damping or echoes. OmniSound® produces natural sound in both directions (full Duplex) as well as 360° sound pick-up and reproduction. An ultra-sensitive microphone provides omni-directional sound pick-up and three built-in surround speakers provide crystal clear sound through the room.

User-friendly functions

The Konftel 200NI has a keypad with a mute button, an R-button for multi-party calls and a menu button. The menu system appears in the clear, illuminated graphic display. The phone book can store up to 50 contacts, along with the last called number, volume settings for the loudspeakers, date, time and call time. You can even select a language!

Smart memory aid

An excellent way of saving time and increasing efficiency is to record the meeting – simply connect the Konftel 200NI to the tape recorder with a special cable, then let the other parties know you'll be recording.
