General specification

Channel Capacity	8 (maximum available on PMR446)
Frequency Range	446.00625MHz to 446.09375MHz
Channel Spacing	12.5KHz
Modulation Type	F3E
Operating Temperature	-20°C to +70°C
Waterproof spec	Submersible IP67
Approval Specification	EN 300 296, ETS 300 279
Duty cycle	24 hours (5%TX/5%RX/90%STDBY)
Dimensions	130(h)mm x 59(w)mm x 33(d)mm
Weight (with battery)	296g (with battery & aerial)

**Full & detailed specification available on request

Supplied accessories

CAT446	High efficiency antenna (fixed)
CNB640E	7.4v 1800mAh Li-Ion battery
CCA230	230v drop in trickle charger
CCA12	12v charger lead
CBH640	Spring loaded belt clip
User manual	
Carry strap	

HT446 Transceiver

Unlike the majority of PMR446 products currently on the market, HT446 is no throw away toy. Entel recognises that today's business users demand the highest levels of performance and dependability to ensure the smooth, efficient running of their workplace.

HT446 draws upon the pedigree of the award winning HT Series design, offering advanced features combined with commercial grade construction. Such a full and complete specification is something that Entel's closest competition can only dream of.

HT446 can be set up and configured by your dealer to access all or as many of the following features as you

choose. Enabled features are accessed by simple menu driven selection, including all CTCSS/DCS tones, built in voice scrambler, voice activation, scanning, vibrate and 20 individual call alert tones.

With the latest lithium-Ion battery technology there will be no more dreaded memory effects associated with poor charging routines, just a full 24 hour battery life, each and every time you collect your radio from the charger. If that's not enough HT446 is completely submersible too!

Equip today and take advantage of this low cost instant communications system.
