The ATL Telecom Card Activated Telephone (CAT) - *the easy way to make a credit card call*

The **Berkshire Card Activated Telephone (CAT Phone)** is operated in conjunction with CreditCall Communications Limited who specialise in innovative cashless payment solutions for a variety of applications. CreditCall provide clearance of the CAT's card transactions and route the calls. The CAT phone has been developed to satisfy the growing demand from hotels, hospitals and universities wanting to provide users with an easy method of making voice and data calls on a pay-as-you-go basis with no post billing.

"The smarter alternative to conventional payphones"

Ease of use

The card reader on the CAT phone accepts most major credit and debit cards, as well as bespoke prepaid phonecards. It offers users a very convenient method of making phone calls without the inconvenience of call loggers and post billing. Where the CAT really scores though, is with the provision of a modem socket at the back of the unit. Now users with laptop PCs can dial-in to their network or the internet and collect e-mail.

Programmable

The CAT phone is compatible with most PABXs, and can also operate on direct exchange lines. It has three memory buttons that can be programmed with service numbers such as an operator or central reservations service.

Customised

The standard CAT phone is supplied with a clear decal showing user instructions. The large flat area on the top of the CAT phone is ideal for screen printing a logo or other text on to, and this is available at reasonable cost.

Call value

Credit and debit card calls are charged similarly to payphone rates, with a minimum charge of 30p/minute. The site owner receives a commission of at least 20% on all credit and debit card calls. Bespoke prepaid phonecards can be produced with selectable call rates.

All major cards accepted.

Applications

- Hotels guest rooms
- Hotel foyers
- Universities
- Hospital wards
