INTRODUCTION

Dear customer.

Thank you for purchasing a Sagemcom DECT telephone we appreciate your trust in us. This product was manufactured with the utmost care, should you encounter difficulties during its use we recommend that you refer to this user guide. You can also find information on the following site: http://www.sagemcom.com

For your comfort and safety, we ask that you read the following section carefully:

RECOMMENDATIONS AND SAFETY INSTRUCTIONS

B

Your DECT telephone must not be installed in a humid room (wash-up room, bathroom, taundry room, kitchen, etc.) unless its in 1.50 m away from a water point or outside telephone must be operated at temperatures ranging from 5°C and 45°C.

Only use the supplied power adapter, connect it to the base socket according to the Installation instructions provided in this booklet and the indications on the identification installation instructions provided in this booklet and the indications on the identification label affixed to it (voltage, current, electric network frequency). As a precaution, in case of danger, the mains adapters act as a disconnecting mechanism for the 230V power supply. They should be placed near the device and should be easily accessible. and the

1 This telephone was designed for use on the public switched telephone network (PSTN). In case of a problem you must first contact your reseller. Only use the supplied telephone cord

For your personal safety, never place your handset on the base without the batteries or without the battery cover, you could get an electric sho

To avoid damaging your handset, only use certified rechargeable AAA batteries NiMH 1.2 V 400 mAH, never use non rechargeable batteries. Insert the batteries in the handset pattery compartment respecting polarity.

R At the end of their useful life, batteries must be disposed of according to the recycling

Your DECT telephone has an inside radio range of about 50 metres and up to 300 metres in open space. The immediate presence of metal parts, (of a television for example), of any electric appliance may result in range reduction.

Some sensitive medical equipment and safety equipment may be affected by the radiofrequency transmissions of your telephone. In all cases, we ask that you respect the

n areas where storms are frequent, we recommend that you protect your telephone line using a surge protection device . This equipment does not function in the case of an electric network shutdown: for

emergency calls, it is recommended to use another unit during power cuts. The CE marking certifies that the product meets the essential requirements of Directive 1999/5/CE of the European Parliament and of the Council pertaining to microwave rad equipment and telecommunication terminal equipment, for the safety and health of users, for electromagnetic interference. Furthermore, it efficiently uses the frequency spectrum attributed to ground and spatial communication to prevent damaging

interference The declaration of compliance may be looked up on the www.sagemcom.com site support" section or can be obtained from the following address

Problem	Solution
No display	 Are batteries fully charged? Try replacing the batteries. Make sure the batteries are properly installed and connected. If you are using AC power, make sure that the unit is connected to a non-switched electrical outlet. Disconnect the unit from the plug and plug it in again. Did you order Caller ID service from your local telephone company?
No dial tone	 Check installation : Is the base power cord connected to a working outlet? Is the telephone line cord connected to the base unit and the wall jack? Disconnect the base from the wall jack and connect another phone to the same jack. If there is no dial tone in the second phone, the problem might be your wiring or local service. Is the handset out of range of the base? Make sure the batteries are properly charged (12 hours). Are the batteries pack installed correctly? The batteries may need to be charged.
Dial tone is OK, but can't dial out	Make sure the tone/pulse setting is correct.
Handset does not ring	Make sure the RINGER setting on the handset is programmed to ON. You may have too many extension phones on your line. Try unplugging some phones. See solutions for «NO dial tone».
You experience static, noise or fading in and out.	 Is handset out of range? Move closer to the base. Does the base need to be relocated? Charge batteries. Make sure base is not plugged into an outlet with another household appliance.

Warning beeps

Replace batteries

Place handset in base for 20 seconds to reset the security code. If that doesn't work, charge batteries for 15 hours.

20

Did you reprogram numbers into memory after power outage or batteries replacement?

Clean charging contacts on handset and base with a soft cloth See solutions for «No dial tone»

Memory dialling
- Did you program the memory location keys correctly?

Did you follow proper dialling sequence?

Make sure the tone/pulse setting is correct.
