Colour Display Telephone with
200 Name and Number Phonebook
and Answering Machine
and SMS Messaging

THIS EQUIPMENT IS NOT DESIGNED FOR MAKING EMERGENCY TELEPHONE CALLS WHEN THE POWER FAILS. ALTERNATIVE ARRANGEMENTS SHOULD BE MADE FOR ACCESS TO DIAL EMERGENCY SERVICES.

Before operating this set,
please read these instructions carefully.

Important note-

This telephone is not designed for making Emergency calls when the main power fails. For Emergency calls you should have a basic phone that does not need mains power, connected to your line so that you can make calls during a power failure.

iDECT Helpline 0845 345 9677 (for UK only)
Monday to Friday from 9:00am to 5:00pm
**Please note that all calls are charged at local rate
Or visit our website: www.idectonline.com

Charging batteries for the first time
Before you start to use your telephone make sure that all batteries are fully charged for 24 hours.

Unpacking your phone

In the box you will find:

- the **cordless handset** (two handsets with a Twin system, three with a Triple system, four with a Quad system and five with a Quin system)

Choosing a site for the base unit and charger pod

The base unit and charger pod(s) should be placed on a level surface, in a position where:

- the mains adapter plug will reach an easily accessible 230-VAC switched mains supply socket - never try to lengthen the mains power cable.

- the base unit's telephone line cable will reach your telephone line socket or extension socket (the charger pod does not have a telephone line connection).

- it is not close to another telephone - this can cause radio interference.

- it is not close to a sink, bath or shower, or anywhere else where it might get wet.

NOTE: if the base comes into contact with liquids, disconnect it promptly and use a soft cloth to dry it; if you believe that the liquid has seeped into the unit, do not reconnect the base station. Contact the IDECT Helpline. Follow the same procedure for your handset and remove the internal batteries.

- it is not close to other electrical equipment - fridges, washing machines, microwave ovens, fluorescent lights, televisions etc.

- it is away from hot, humid conditions and strong sunlight.

Radio signals between handset and base unit

Signal range between the handset and the base station is in accordance with the approved standard for DECT phones:

- Maximum range: 300 metres outdoors.

- Maximum range: 50 metres indoor.

The signal range could become lower during normal use. Any large metal object, like a refrigerator, a mirror, a filing cabinet, metallic doors or reinforced concrete, between the handset and base unit may block the radio signal. The signal strength may also be reduced by other solid structures, like walls, or by other radio or electrical interference.

For stronger radio signal, it is recommended that your telephone is at the highest possible position. If there is no radio signal reception, Base 1 message and the signal level Y icon will flash on the display.

Interference

If the sound quality gets worse as you move around while on a call, this is probably caused by interference between the handset and the base unit, perhaps because you are too near to another phone or other electrical equipment.

Move to a different position to clear the interference. If you do not move, it might cause a short break or your call may be cut off.

"Out of range" warning

If you hear a warning tone during a call, and the sound in the earpiece becomes faint or distorted, you may be going out of range of the base unit.

Move nearer to the base unit within 20 seconds, until the warning tone stops. Otherwise, your call may be cut off.

Mains power connection

IMPORTANT - The iDECT X3i base unit must be used with the mains adapter supplied with the unit.
Using any other adapter will result in non-compliance with EN60950, and will invalidate any approval given to this apparatus.

Battery safety

ONLY use the rechargeable batteries supplied with the handset.
DO NOT use non-rechargeable batteries - they may burst and cause damage to your telephone.

If you have a Broadband line

If you connect your telephone to a line with a broadband connection, you will need to insert a micro-filter between the telephone and the telephone line; otherwise you may get interference between the telephone and the broadband, which could cause problems.
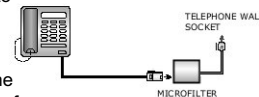

In a home with broadband, every telephone must have a micro-filter connected, not just the one at the telephone point that your modem is connected to. If you need more broadband micro-filters, contact your broadband supplier.

1 **Choose a suitable site for the base unit (see page 3).**

2 **Connect the mains power lead and the telephone line cord into the base unit.**

Plug one end of the telephone line cord into the socket on the back of the base. Use the telephone line cord supplied with your iDECT X3i - other line cords may not work with this phone.
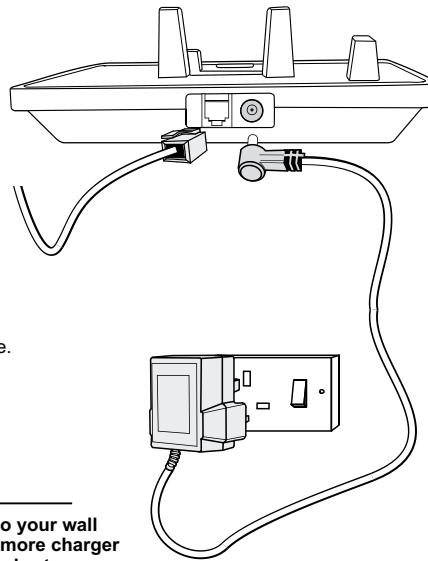

3 **Plug the mains adaptor into your wall socket. If you have one or more charger pods, plug in the mains adaptors accordingly.**

Make sure that the 230VAC, 50hz mains socket is switched OFF when you plug the mains adapter into the socket. Switch it ON only when you have the adaptor plugged in safely.
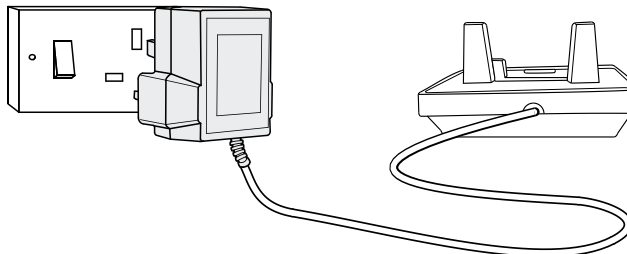

4 **Fit the rechargeable batteries in each handset.**

A. Push down on the top of the battery compartment cover (located on the back of the handset) and slide the cover off as shown.

B. Lift the battery pack and connect its plug to the socket inside the compartment, as shown.

BLACK

RED

Store the wire in the gap after installing the battery.

---
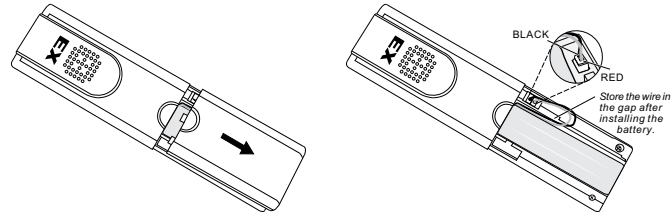

5 **Charge the batteries for 24 hours before 1st time use.**

Before you use the handset for the first time, it is important that you charge the batteries fully. You will hear a 'beep' when the handset is correctly positioned on the charging cradle.

Leave the handset on the base unit or charger pod for 24 hours. To keep the batteries charged, whenever you don't need to use the handset (such as overnight, or when you go out), leave it on the base unit or charger pod.

The bars on the battery level symbol continuously change as the batteries are being charged.

Battery life:
Standby time: 100 hours
Talk time: 10 hours

The CHARGE light comes on.

Note:
Battery life depends on device usage. Therefore, it is recommended that you read the following notes of caution.

- When the batteries are low, the handset will display the corresponding icon. Place the handset back on the base station: the battery icon will start flashing.
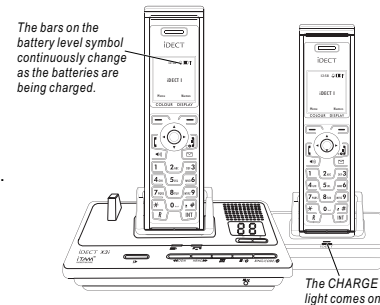

- Use only original batteries and charge them only on the original base station or charger pod(s).
- Insert the batteries properly as previously described.
- Do not dispose of the batteries in fire: this may cause an explosion.
- Remove the batteries from its compartment if the phone is not used for a long period of time.

---

6 **Connect the base unit to the telephone line.**

Switch OFF power at the mains socket and insert the telephone line plug into the socket then switch mains power back ON.
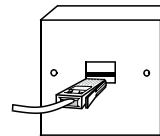

Your Telephone Operations

Switching on/off

1   Press the **HANG UP/ C** button to turn the phone 'ON'.

2   Press the **HANG UP/C** button and hold for two seconds to turn the phone 'OFF'.

      ** You can switch the handset off and save battery.

      ** When the handset is in "off" mode, the unit can not be used for emergency calls.

Note: To answer a call when the handset is switched off, you need to switch it back on. It may take a few moments for the handset to re-establish a radio link with the base unit.

To lock/unlock the key pad

To lock

1   Press the **HASH** button and hold for 2 seconds until the ⚲ icon appears on the display.

To unlock

1   Press the ⌐ button to select '**Unlock**'.

2   Press the ⌐ button for '**Yes**' to confirm. The ⚲ icon will disappears from the display.

Set time & date

1   Press the menu ⌐ button.

      → The display shows **SMS**.

2   Use the **UP/▲** or **DOWN/▼** to select **Time setting**.

      → The display shows **Time setting >Alarm**.

4   Use the **UP/▲** or **DOWN/▼** to select **Set Date & Time**.

5   Press the ⌐ button.

      → The display shows **Date:**.

6   Use the digit keys 0 to 9 to enter the date -format DD/MM.

8

7   Press the OK button.
→ The display shows **Time (24 Hr):**.

8   Use the digit keys to enter the time 0 to 9 - format HH:MM (It's a 24 hour clock).

9   Press the button to confirm.
→ The display shows **Time & Date Saved**.

10   Press the **HANG UP/C** button to return to idle mode.

** The time of Answering Mechine need to be set seperately.
(Ref to Page 39)

Set the Alarm

Set the Alarm

1   Press the menu button.
→ The display shows **SMS**.

2   Use the **UP/▲** or **DOWN/▼** to select **Time setting**.

3   Press the button.
→ The display shows **Time setting >Alarm**.

4   Press the button to select **Alarm**.

5   Press the button to select **On/Off**.

6   Use the **UP/▲** or **DOWN/▼** to select the frequency (On Once, On Daily or Off), then press **OK**.
→ The display shows **Time (24 Hr):.**

7   Use the digit keys 0 to 9 to enter the time - format HH/MM (24 hour clock).

8   Press the button to confirm.
→ The display shows **Done**.

9   Press the **HANG UP/C** button to return to idle mode.

** Alarm tone will last for 1 minute and can be stopped by pressing any key on the handset.

Set Alarm tone

1   Press the menu button.
→ The display shows **SMS**.

2   Use the **UP/▲** or **DOWN/▼** to select **Time setting**.

3   Press the button.
→ The display shows **Time setting >Alarm**.

4   Press the button to select **Alarm**.

5   Use the **UP/▲** or **DOWN/▼** to select **Set Alarm Tone**.

6   Press the button.
→ The display shows **Alarm Tone**.

7   Use the **UP/▲** or **DOWN/▼** to select the alarm tone (there are four tones to choose form).

8   Press the button.
→ The display shows **Alarm Tone Saved**.

9   Press the **HANG UP/C** button to return to idle mode.

Your handset's name (change the name)

The name can be up to 8 characters.

1   Press the menu button.
→ The display shows **SMS**.

2   Use the **UP/▲** or **DOWN/▼** to select **Handset**.

3   Press the button.
→ The display shows **Handset >Ringtone**.

4   Use the **UP/▲** or **DOWN/▼** to select **Handset Name**.

5   Press the button.
→ The display shows **Name: iDECT**.

6   Press the button to delete characters.

7   Use the digit keys to enter letters.

8   Press the button to confirm.
→ The display shows **Done**.

9   Press the **HANG UP/C** button to return to idle mode.

10

Select your handset display language

1   Press the menu button.
→ The display shows **SMS**.

2   Use the **UP/▲** or **DOWN/▼** to select **Handset**.

3   Press the button.
→ The display shows **Handset >Ringtone**.

4   Use the **UP/▲** or **DOWN/▼** to select **Language**.

5   Press the button, then press the **UP/▲** or **DOWN/▼** button to go through the language list (there are 4 languages to choose from).

6   Press the button to select the language e.g. English, the display shows **English Saved**.

7   Press the **HANG UP/C** button to return to idle mode.

Note: The 4 languages are: Italiano, Deutsch, Español, English.

Select your handset display colour

1   Press the menu button.
→ The display shows **SMS**.

2   Use the **UP/▲** or **DOWN/▼** to select **Handset**.

3   Press the button.
→ The display shows **Handset >Ringtone**.

4   Use the **UP/▲** or **DOWN/▼** to select **Menu Colour**.

5   Press the button, then press the **UP/▲** or **DOWN/▼** button to go through the colour list (there are 3 colours to choose from).

6   Press the button to select the colour e.g. Yellow, the display shows **Saved**.

7   Press the **HANG UP/C** button to return to idle mode.

Note: The 3 colours are: Blue, Green, Yellow.

Select your handset Wallpaper

1 Press the menu ⊏⁻ᐟ button.
→ The display shows **SMS**.

2 Use the **UP/▲** or **DOWN/ ▼** to select **Handset**.

3 Press the ⊏⁻ᐟ button.
→ The display shows **Handset >Ringtone**.

4 Use the **UP/▲** or **DOWN/ ▼** to select **Wallpaper**.

5 Press the ⊏⁻ᐟ button, then press the **UP/▲** or **DOWN/▼**
button to go through the wallpaper list : **Butterfly** and **Sunset** .

6 Press the ⊏⁻ᐟ button to select the wallpaper
e.g. BUTTERFLY, the display shows **SAVED**.

7 Press the **HANG UP/C** button to return to idle mode.

Making and answering calls / Earpiece volume adjustment during calls

Make a call

1 Press the **PHONE** ⊏ button or the **SPEAKERPHONE** 🔊
button to connect to the line.

2 Then dial the required telephone number.

3 Press **UP/▲** or **DOWN/▼** button to adjust the volume of the
earpiece during your conversation (5 volume levels).

4 Press the **HANG UP/C** button to end the call.

Note: You can also make a call by using the Pre-dial function: Dial the
required telephone number first (if you enter a wrong number use the
⌐⁻ᐟ button to delete and re-enter) then press the **PHONE** button to
make the call.

Answer a call

1   Press the **PHONE** ⟦ button or Speakerphone buttonn to answer a call when the telephone rings.

2   Press **UP/▲** or **DOWN/▼** button to adjust the volume of the earpiece during your conversation (5 volume levels).

3   Press the **HANG UP/C** button to end the call.

Note: If Auto answer is set then lifting the handset off the base or charger will answer the call and no buttons need to be pressed.

Last number redial function

1   Press **UP/▲** to view dialled calls.
→ The display shows **Dialled calls**.

2   Use the **UP/▲** or **DOWN/▼** button to stroll through the list of dialled numbers.

3   Once selected press the **PHONE** ⟦ button to dial.

4   Press the **HANG UP/C** button to end the call.
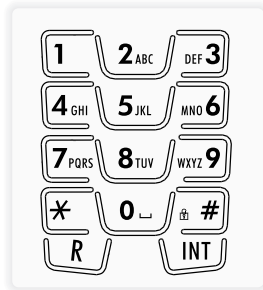

How to enter characters?

To use the characters you press on the button where you see the character, e.g. if you want to insert the letter 'A', you press '2' 2_{ABC}, if you want to insert the letter 'B', you press twice and for 'C', three times etc.

If you want to insert 'AA', then you will have to wait for the first 'A' to stop flashing then insert the second 'A'. Press '0' $0_{\smile}$ for space.

2   Use the **UP/▲** or **DOWN/▼** button to select **Calls lists**.

3   Press the ⬜ button.
→ The display shows **Calls lists >Received calls.**

4   Press the ⬜ button and a list of received calls will appear.

5   Use the **UP/▲** or **DOWN/▼** button to stroll through the list of received numbers.

*If you want to dial a telephone number from the list press PHONE and the number will appear.

6   Press the **HANG UP/C** button to go back to idle mode.

To delete the caller ID log

1   Press the menu ⬜ button.
→ The display shows **SMS**.

2   Use the **UP/▲** or **DOWN/ ▼** to select **Calls lists**.

If you want to clear all...:

1   Press the ⬜ button.

2   Use the **UP/▲** or **DOWN/ ▼** to select **Delete Calls List**.

3   Press the ⬜ button.
→ The display shows **Delete Calls List >Received calls.**

4   Press the ⬜ button.
→ The display shows **Delete received calls list?**

5   Press the ⬜ button for **OK**.
→ The display shows **All received calls deleted.**

If you want to clear individually…:

1 Press the ▭ button, the list of caller ID will appear.

2 Use the **UP/▲** or **DOWN/▼** to stroll through the list of received numbers.

3 Once selected the number you want to delete, press the ▭ button.
→ The display shows **Delete**.

4 Press the ▭ button.
→ The display shows **Call Deleted**.

Press the **HANG UP/C** button to go back to idle mode.

To store a Caller ID contact in the phonebook

1 Press the menu ▭ button.
→ The display shows **SMS**.

2 Use the **UP/▲** or **DOWN/▼** button to select **Calls lists**.

3 Press the ▭ button.
→ The display shows **Calls lists >Received calls.**

4 Press the ▭ button to select and a list of received calls will appear.

5 Use the **UP/▲** or **DOWN/▼** button to stroll through the list.

6 Press the ▭ button.

7 Use the **UP/▲** or **DOWN/▼** button to select **Save Number**.

8 Press the ▭ button for **OK**.
→ The display shows **Name:**.

9 Use the digit keys to enter characters of the name, e.g. Jane.

10 Press the ▭ button for **OK**.
→ The display shows **Number:**.

11 Check if it is the number you want to save.

12 Press the ▭ button for **OK**.
→ The display shows **Jane Added to names**.

13 Press the **HANG UP/C** button to go back to idle mode

Change handset ringer volume

1   Press the menu ⬛ button.
→ The display shows **SMS**.

2   Use the **UP/▲** or **DOWN/▼** button to select **Handset**.

3   Press the ⬛ button.
→ The display shows **Handset >Ringtone**.

4   Use the **UP/▲** or **DOWN/▼** button to select **Ring Volume**.

5   Press the ⬛ button.

6   Use the **UP/▲** or **DOWN/▼** button to choose the ringer volume you want (Level from silent to 5).

7   Press the ⬛ button for **OK**.
→ The display shows **Ring Volume Saved**.

8   Press the **HANG UP/C** button to go back to idle mode.

Change handset ringer melody

1   Press the menu ⬛ button.
→ The display shows **SMS**.

2   Use the **UP/▲** or **DOWN/▼** button to select **Handset**.

3   Press the ⬛ button.
→ The display shows **Handset >Ringtone**.

4   Press the ⬛ button.

5   Press the ⬛ button to select **External Call**.

6   Use the **UP/▲** or **DOWN/▼** button to choose the ringer melody you want (from 1 to 10), e.g. Melody 7.

7   Press the ⬛ button for **OK**.
→ The display shows **Ringtone Saved**.

8   Press the **HANG UP/C** button to go back to idle mode.

Make intercom calls

1 `INT` Press the **INTERCOM** `INT` button on any handset
(i.e. handset 1).
→ The display shows **Internal Call**.

2 [keypad] Use the digit buttons to enter the handset number you want to
call. (e.g. Handset 2)

Handset 2 will ring.

3 [phone] Press the handset 2's **PHONE** button to answer intercom
call.

4 [hang up] Press the **HANG UP/C** button to go back to idle mode.

Transfer calls

When one handset is on an external call and you want to
transfer call to another handset.

1 `INT` Press the **INTERCOM** `INT` button on your handset.
→ The display shows **Internal Call**.

2 [keypad] Use the digit buttons to enter the handset number you want to
transfer the call to and the external caller will be automatically
put on hold. (e.g. Handset 2)

3 Handset 2 will ring.

4 [phone] Press **PHONE** on ringing handset and the two internal handsets
will be connected and can hold a private conversation, while the
external call remains on hold.

5 [hang up] You can press the handset 1's **HANG UP/C** button to transfer
call to handset 2. Which ever of the handsets hangs up first
will automatically connect the other handset to the external call.

Set up a three-way conference

You can have a three-way conference when you are on a call with an external line.

1 `[INT]` Press the **INTERCOM** `[INT]` button on your handset.
→ The display shows **Internal Call**.

2 `[keypad]` Use the digit buttons to enter the handset number you want to enter the conference and the external caller will be automatically put on hold. (e.g. Handset 2)

Handset 2 will ring.

3 `[#]` When the handset 2 answers your intercom call, press and hold the handset 1's **HASH** button to enter conference call.

4 `[handset]` Any party can exit the conference by pressing the **HANG UP/C** button, leaving the other two parties connected.

Paging handset

The paging function is useful when you need to locate your handset(s).
At the bottom of the base set you will find the **HANDSET**

LOCATOR `(🔊)` button.

1 `(🔊)` Press the **HANDSET LOCATOR** `(🔊)` button and your handset(s) will ring.

2 `[button]` Press `[⎯]` or `[⎯]` button of the handset to stop it ringing.

Handset registration

* When you purchase a iDECT X3i multi-handset system, all handsets are already registered: you do not need to register any of the handsets.

* Handset registration is only necessary when you buy an extra-handset by itself.

Registering a handset

1   On the base unit, press and hold the **Handset Locator** button at the bottom of base set until you hear registration tone (repeated 'beeps').

2   On the handset unit, press the menu button.
→ The display shows **SMS**.

3   Use the **UP/▲** or **DOWN/▼** button to select **Registration**.

4   Press the button.
→ The display shows **Registration > Register Handset**.

5   Press the button.

6   Use the **UP/▲** or **DOWN/▼** button to stroll through the list of base. (If any of the list with Star ✳ at right side, the handset is already registered to that base unit.) When you reach the base you want to register, press the button to select. (e.g. Base 1)
→ The display shows **System PIN**.

7   Enter the PIN using the digit buttons. (Default PIN: 0000)

8   Press the button for **OK**.
→ The display shows **Base Search**.
The display will go back to idle mode if the registration is successful.

De-registering a handset

*This operation is necessary when one of your handset is out of order and needs to be repaired.

1   Press the menu ⬒ button.
→ The display shows **SMS**.

2   Use the **UP/▲** or **DOWN/▼** button to select **Registration**.

3   Press the ⬒ button.
→ The display shows **Registration > Register Handset**.

4   Use the **UP/▲** or **DOWN/▼** button to select **De-register**.

5   Press the ⬒ button.
→ The display shows **System PIN**.

6   Enter the PIN using the digit buttons. (Default PIN: 0000)

7   Press the ⬒ button for **OK**.
→ The display shows **Please Wait**.

8   Use the **UP/▲** or **DOWN/▼** button to stroll through the list of handset. When you reach the one you want to de-register press the ⬒ button to select. (e.g. Handset 1)
→ The display shows **Confirm?**.

9   Press the ⬒ button for **OK**.
→ The display will shows **De-registered**.

10   Press the **HANG UP/C** button to go back to idle mode.

Note: You can't delete your own handset.

Select a base unit

1	⬜	Press the menu ⬜ button. → The display shows **SMS**.
2	◉	Use the **UP/▲** or **DOWN/▼** button to select **Registration**.
3	⬜	Press the ⬜ button. → The display shows **Registration > Register Handset**.
4	◉	Use the **UP/▲** or **DOWN/▼** button to select **Select Base**.
5	⬜	Press the ⬜ button.
6	◉	Use the **UP/▲** or **DOWN/▼** button to stroll through the different bases.
7	⬜	Once you have selected the base you want to register the handset to the base, press the ⬜ button to select. (e.g. Base 1) → The display shows **Registered to Base**. * The display will go back to idle mode if the handset search to base is successful. * **AUTOMATIC** to let the handset search for the nearest free base unit.

SMS text messaging

If the iDECT X3i is the only phone connected to the phone line, the "Terminal Number" parameter in the SMS settings menu (see " SMS text messaging") should be set to 9.

The default setting for the terminal number of iDECT X3i is generally set to 9.

If multiple SMS-enabled phones are connected to the same phone line, for the SMS service to function properly, you will have to identify the enabled main phone to receive all the SMS messages for the line. The terminal number for this phone has to be set to 9.

The other phones that have an individual and different terminal number, ranging between 1 and 8, will also be able to send and receive SMS messages properly.

Note: Different terminals using the same telephone line should each be assigned a unique terminal number different from the other phones.

You can send and receive up to 35 standard SMS messages with a maximum of 160 characters, or up to 8 messages with up to 612 characters.

Set terminal number

1 Press the **MESSAGE** button.
→ The display shows **SMS >New Message**.

2 Use the **UP/▲** or **DOWN/▼** button to select **Settings**.

3 Press the button.
→ The display shows **Settings > Service Centres**.

4 Use the **UP/▲** or **DOWN/▼** button to select **Terminal Number**.

5 Press the button.
→ The display shows **Terminal Number**. (Default is 9)

6 Use the **UP/▲** or **DOWN/▼** button or KEYPADS to enter the terminal number.

7 Press the button for **OK**.
→ The display shows **Done**.

8 Press the **HANG UP/C** button to go back to idle mode.

Set SMS alert

1 Press the **MESSAGE** ⊠ button.
→ The display shows **SMS >New Message**.

2 Use the **UP/▲** or **DOWN/▼** button to select **Settings**.

3 Press the ⊏⊐ button.
→ The display shows **Settings > Service Centres**.

4 Use the **UP/▲** or **DOWN/▼** button to select **SMS Alert**.

5 Press the ⊏⊐ button.
→ The display shows **Set Alert >Off**.

6 Use the **UP/▲** or **DOWN/▼** button to choose **Off**, **On** or **Set Alert**.

*If you select **Set Alert**, there are three tones to choose from (**Morse, Discreet and Polyphonic**.)

7 Use the **UP/▲** or **DOWN/▼** button to choose tone.

8 Press the ⊏⊐ button for **OK**.
→ The display shows **Ringtone saved**.

9 Press the **HANG UP/C** button to go back to idle mode.

Set receive centre number

1 Press the **MESSAGE** ⊠ button.
→ The display shows **SMS >New Message**.

2 Use the **UP/▲** or **DOWN/▼** button to select **Settings**.

3 Press the ⊏⊐ button.
→ The display shows **Settings > Service Centres**.

4 Press the ⊏⊐ button.

5 Use the **UP/▲** or **DOWN/▼** button to select **Receive Centre**.

6 Press the ⊏⊐ button.
→ The display shows **Receive Centre**. (Default: 080058752)

7 Press the ⊏⊐ button to clear number.

8 Use the keypad to enter the new service centre number.

9 Press the ⊏⊐ button for **OK**.
→ The display shows **Done**.

10 Press the **HANG UP/C** button to go back to idle mode.

Set sending centre number

1		Press the **MESSAGE** button. → The display shows **SMS >New Message**.
2		Use the **UP/▲** or **DOWN/▼** button to select **Settings**.
3		Press the button. → The display shows **Settings > Service Centres**.
4		Press the button.
5		Use the **UP/▲** or **DOWN/▼** button to select **Sending Centre**.
6		Press the button. → The display shows **Sending Centre**. (Default: 1470P17094009)
7		Press the button to clear number.
8		Use the keypad to enter the new sending centre number.
9		Press the button for **OK**. → The display shows **Done**.
10		Press the **HANG UP/C** button to go back to idle mode.

Selecting message size

1		Press the **MESSAGE** button. → The display shows **SMS >New Message**.
2		Use the **UP/▲** or **DOWN/▼** button to select **Settings**.
3		Press the button. → The display shows **Settings > Service Centres**.
4		Use the **UP/▲** or **DOWN/▼** button to select **Message Size**.
5		Press the button.
6		Use the **UP/▲** or **DOWN/▼** button to choose **612 Chars** or **160 Chars**.
7		Press the button for **OK**. → The display shows **Done**.
8		Press the **HANG UP/C** button to go back to idle mode.

Write and send a message

1   Press the **MESSAGE** button.
          → The display shows **SMS >New Message**.

2   Press the button.

3   Enter the text message using the alphanumeric keypad. Press
          the number key corresponding to your desired alphabet (see
          Memory phonebook management for keys).
          * You can clear by pressing the button.

4   Once you have finished your message, press the button.
          → The display shows **Send to**.

5   Press the button.
          → The display shows **Number:**.

          Enter the number you want to send the message to.
          Or
          Press the button to search your phonebook.

          Use the **UP/▲** or **DOWN/▼** button to stroll through your
          phonebook.

          Once you have found the name you want to send the message
          to press the button to select and number of the person
          would appear.

          Press the button for **OK**.
          Once the message is sent the display will go back to idle mode.

Note: You can insert a symbol using the symbol table when writing a message
by pressing OPTIONS, DOWN twice and OK.

Save a text message to Outbox

          After writing a message you can save the message in outbox.

1   Once you have finished your message press the button.
          → The display shows **Send to**.

2   Press the **DOWN/▼** button until **Save**.

3   Press the button.
          → The display shows **Saved**.

4   Press the **HANG UP/C** button to go back to idle mode

Delivery receipt

Before sending a message, you can activate the delivery receipt feature that confirms whether or not the message has been sent.

1 Once you have completed your message, press the ⌐ button.
→ The display shows **Send to**.

2 Use the **UP/▲** or **DOWN/▼** button to select **Notify**.

3 Press the ⌐ button.
→ The display shows **Notify >Off**.

4 Use the **UP/▲** or **DOWN/▼** button to select **On** or **Off**.

5 Once selected, press the ⌐ button.
→ The display shows **Done**.
* The display will go back to message mode and you can continue to send your message.

Read your text message

When you receive an incoming message, the handset will emit an alert tone and the message icon will appear on the display. The message received will be saved in Inbox.

⌐ You can read the message by pressing the ⌐ button.

If you want to read an old message…

2   ⊑ Press the ⊑ button.

3   ◉ Use the **UP/▲** or **DOWN/▼** to stroll through the list of handsets.

4   ⊑ Once you have chosen, press the ⊑ button
      → The display shows **Handset Priority**.

5   ◉ Use the **UP/▲** or **DOWN/▼** to stroll through the list rings (Ring 2, 4 and 6).

6   ⊑ Once you have selected, press the ⊑ button.
      → The display shows **Handset Priority Saved.**

7   📱 Press the **HANG UP/C** button to go back to idle mode.

Setting the day, clock, number of rings and security remote code

If you pause too long between the steps listed below, the machine will time out and you will need to start again.

To set the day

1   Press and hold the **CLOCK/RING/CODE**   button until the machine says '**SET DAY**' and then the set day.

2   Press the **FAST FORWARD**   or **REWIND**   button until you reach the day you want to set. As you press the machine will say the days.

3   Press the **CLOCK/RING/CODE**   button to confirm and the machine will say '**SET HOUR**' and then the set hour (24-hour clock).

To set the clock

1   Press the **FAST FORWARD**   or **REWIND**   button until you reach the hour you want to set. As you press the machine will say the hour and the display on the base will display the hour.

2   Press the **CLOCK/RING/CODE**   button to confirm and the machine will say '**SET MINUTES**' and then the defaulted minutes.

3   Press the **FAST FORWARD**   or **REWIND**   button until you reach the minutes you wish to set. As you press the machine will say the minutes and the display on the base unit will also shows the minutes.

4   Press the **CLOCK/RING/CODE**   button to confirm and the machine will say the day and time you have set, '**SET RING**' and then the set number of rings.

To set the ring

1   Press the **FAST FORWARD**   or **REWIND**   button until you reach the rings you wish to set. As you press the machine say the number of rings.

2   Press the **CLOCK/RING/CODE**   button to confirm and the machine tell you the number of rings you have set. The machine will then say '**SET SECURITY CODE**' and the first digit of the set security remote code.

To set the security remote code

1   Press the **FAST FORWARD**   or **REWIND**   button until you reach the first number you want to set. As you press the machine will say the number and the display on the base will also shows it (the code has 3 digits, and the default is 321).

2   Press the **CLOCK/RING/CODE**   button to confirm and the machine will say the first digit you have set and '2' for the second digit.

3   Repeat steps 1 and 2 to set the second and third digit for the security remote code. When you have set all 3 digits the machine will say the numbers you have set.

Note: If you wish to change the day, clock, ring or security code then just repeat the same steps as above.

To check the day, clock, number of rings and security remote code of your answering machine

1   Press the **CLOCK/RING/CODE**   button and the machine will say all settings.

Note: The machine can answer calls after two to ten rings.

         If you do not set the number of rings, the machine will answer after five rings.

To set ring volume

1   During standby stage.

2   Press the **VOLUME -** or **+**   buttons to select volume of ringer.

         The base display will show the setting from r0 to r5, where r0 is off and r5 is the loudest setting.The base ringer will sound as the setting is changed.

Outgoing messages (OGMs)

An OGM is the greeting the caller hears when he/she gets through to . the answering machine. The X3i has two OGMs and you can record your own message.

OGMs that are already on the machine:

OGM1- this invites callers to leave a message: **'Sorry, we cannot answer your call now. Please leave your message after the beep.'**

OGM2 - this simply asks callers to try later and does not give them the opportunity to leave a message: **'Please call later.'**

If you wish to create your own OGM, you can record between 4 seconds to 2 minute. If you speak for less than 4 seconds, your message will not be recorded.

To record OGM1

1   Press and hold the **ON/OFF/STOP** button until the machine says '**ANSWERING MACHINE ON**' and the base unit's display should change from - - to 00.

2   Press and hold the **OGM/REWIND** button until you hear a beep and the segments on the base unit's display will start to rotate.

3   Record your personal **OGM**, speaking clearly from a distance of about 15cm (6 inches) from the base unit's microphone.

4   When you have finished speaking press the **ON/OFF/STOP** button to stop the recording and the machine will play back your recorded **OGM**. If you want to change it, simply record it again by following steps 1 - 4.

To record OGM2

1   If the machine is not on press and hold the **ON/OFF/STOP** button until the machine says '**ANSWERING MACHINE ON**'. The base unit display should shows 00.

2   Press the **ON/OFF/STOP** button and the base unit display should shows 02 then A0.

3   Press and hold the **OGM/REWIND** button until you hear a beep and the segments on the base unit's display will start to rotate.

4   Record your personal **OGM**, speaking clearly from a distance of about 15cm (6 inches) from the base unit's microphone.

5   When you have finished speaking press the **ON/OFF/STOP** button to stop the recording and the machine will play back your recorded **OGM**. If you want to change it, simply record it again by following steps 1 - 4.

Note: You can listen to your OGM at any time by pressing the OGM button.

Switch on/off the answering machine

1   Press and hold the **ON/OFF/STOP** button to switch the machine 'on' or 'off'.

When the machine is first switched on, **OGM1** is selected, so callers will be able to leave messages. The base unit's display flashes to shows the number of new messages; or shows the total number of messages with a steady display if there are no new messages.

When the machine is switched off, it will answer after 15 rings and play **OGM2**. You can switch it on using remote operation.

To switch between OGMs

1   Press the **ON/OFF/STOP** button switch between OGM1 and OGM2.

When **OGM2** is selected, the display shows A0 (for 'announcement only', because callers can't leave messages). When you switch between OGMs, the machine will play the one selected.

Note: When **OGM2** is selected the machine will not record messages therefore if you want callers to leave messages make sure **OGM1** is selected.

To record a memo

To record a memo
You can record a memo (for 4 seconds to 2 minutes) directly into the machine. It will be played back together with any messages from callers.

1   Press and hold the **MEMO/FAST FORWARD** button until you hear a beep sound and the segments on the base unit's display will start to rotate.

2   Record your memo, speaking clearly from a distance of about 15cm (6 inches) from the base unit's microphone.

3   When you have finished speaking press the **ON/OFF/STOP** button to stop the recording and the base unit's display will flash the memo number e.g. if it's the first memo the display will flash 01, the second 02 etc.

Play messages

The base unit's display will show the number of new messages and/or memos (memos are counted as messages).

1 Press the **PLAY/PAUSE** button to play all new messages and memos.

The machine will tell you the number of messages you have altogether; and then the number of new messages. Before playing each new message, it tells you the day and time it was recorded (according to the day and time you have set the machine).

Pause and restart message

1 Press the **PLAY/PAUSE** button to play all new messages and memos.

When you press the **PLAY/PAUSE** button, the base unit's display will show PA . If you don't press the **PLAY/PAUSE** button to restart playback, it will restart automatically after a 2-minute pause.

Play all messages

1 After playing your new messages you can press the **PLAY/PAUSE** button again to play all your messages.

Repeat/Rewind

1 To repeat the current message, press the **REWIND/OGM** button.

2 To replay the previous message, press the **REWIND/OGM** button twice.

Skip/Fast Forward

1 To skip to the next message, press the **FAST FORWARD/MEMO** button.

Volume control

To adjust the volume of the loudspeaker during playback:

1 Press the **VOLUME -** or **+** buttons under the base unit display (there are 10 volume levels including **L0** for 'off').

To intercept a call

If you hear the answering machine recording a message and you want to intercept the call and speak to the caller, you can:

Press the **PHONE** button on the handset.

OR

Press the **SPEAKERPHONE** button on the handset.

OR

Lift the handset of any other phone connected to the same line.

Note: When you intercept a call, the machine will stop recording the caller's message. If you intercept a call within 3 seconds of its start, the answering machine may not stop the machine recording.

To delete the current messages

1   Press the **DELETE** button during playback.

To delete all old messages

1   Press and hold the **DELETE** button until the machine says '**All messages deleted**'.

Note: Remember to delete messages after you have listened to them otherwise the machine's memory may become full and will not be able to record any new messages. When the memory is full the base unit's display will show FU. (When the memory is full, it will answer after 15 rings.)

The machine will not delete any messages you have not yet listened to. The machine's memory has room for 12 minutes of recording time, or up to 55 individual messages.

To go back to the default OGMs

If you no longer want callers to hear the OGMs you have recorded, you can delete them and revert to the original OGMs.

1   If necessary, press the **ON/OFF/STOP** button to switch to the OGM you want to delete.

2   Press the **OGM/REWIND** button to play the message

3   While the message is playing, press the **DELETE** button.

Remote operation

You need to enter a three-digit pass number if you want to dial home to receive your messages. The original pass-number is **321**. Otherwise you are able to set your own three-digit pass number (please see page 39).

To check your messages remotely

1   Using a tone dialling phone, dial your home number

2   When you hear your outgoing message, press the **STAR** ⟨✳⟩ button and you will hear 'Security code' and a 'beep'.

3   Enter your remote security code and your will hear a long 'beep'.

4   Press '2' on your handset to play back your messages and/or use the keys listed in the table overleaf.

Note:

■ At steps 2, 3 and 4, you must press the key within 7 seconds, or the machine will cut off your call.

■ At step 3, if you key in the wrong code, you can try again. You have up to three attempts to get the code right before the machine cuts off your call.

Remote operation keys

Keys to press during remote operation

Interrupt and bypass the outgoing message (OGM)	✳
Play new messages (after playing back new messages, you can press this again to hear all recorded messages)	2 ABC
Pause and restart during message playback	2 ABC
Skip the current message to the next one	DEF 3

Repeat the current message	**1**
Go back to the previous message	**1** **1**
Stop playback or recording	MNO **6**
Delete the message currently being played back	**7** PQRS
Delete all messages that have been played back	**0** ⌴
Play the outgoing message (OGM1 or OGM2)	**4** GHI
Record a new outgoing message (OGM1 or OGM2)	**5** JKL
Record a memo	⌂ **#**
Switch the machine on	WXYZ **9**
Switch the machine off	**8** TUV

Switching on remotely

If the answering machine is switched off, if will answer your call after 15 rings. To switch the machine on remotely:

1   [✳]   When you hear your outgoing message, press the **STAR** [✳] button

2   When you hear 'Security code' and a 'beep', key in your remote security code.

3   Press '9' on your handset to switch on.

ALWAYS check first that:	■ You have followed all the steps listed on page 5 to install and set up your iDECT X3i.
	■ All **connectors** are firmly inserted in their sockets.
	■ **Mains power** to the base unit is switched on at the socket.
	■ The handset's **batteries** are correctly and securely installed and are not run down.

Everyday use

"The handset does not switch on."	Check the **connection of the batteries** as they are probably flat or not inserted properly and **charge the handset** on the base station.
"The handset switches on but cannot be connected to the base station."	Check the **connection** of **the power supply unit** of the base unit.
	Verify that the **network socket** where the **power supply unit** is plugged in received **voltage**.
	Repeat the **handset registration** procedure as described on page 24.
"I cannot make or answer calls."	If the handset's display is blank. It may be **switched off.** Press the **HANG UP** button for five seconds to switch it back on.
	Check that the base unit's **mains power adapter** is plugged in and **power is switched on.** The base unit needs mains power for normal operation of the phone not just for charging the batteries.
	Make sure you are using the **telephone line cable** supplied with your iDECT X3i. Other telephone line cables might not work.
	Move the handset **closer** to the base unit.
	Check the **battery Level** symbol on the display. If it is low, replace the handset on the base unit or charger pod to recharge the batteries.
	Switch off power at the mains socket, wait for a few seconds and then **switch back on.** This may solve the problem.

"I cannot make a call."	The handset's keypad may be **locked.** Unlock it before you make a call.
	Only one handset (or the base unit) can be connected to the outside line at once. If another handset is already using the line, you need to wait until it's finished its call.
"When I press keys, nothing happens."	Make sure the **batteries** are fitted in your handset. If the Battery Level symbol on the display shows 'low', put your handset back on the cradle for it to charge.
"When I key in a number, it appears on the display, but I can not make an outside call."	Try a **different position** for the base unit somewhere higher if possible, or further from other electrical equipment.
	Try moving the handset **closer** to the base unit.
"The phone does not ring."	Check that the base unit's **mains power** adapter is plugged in and power is switched on. The base unit needs mains power for normal operation of the phone not just for charging the batteries.
	Make sure you are using the **telephone line cable** that was supplied with your iDECT X3i. Other telephone line cables might not work.
"My call was cut off when I went out of range. Now I can't use my handset."	Move the handset **closer** to the base unit before you try again to make a call.
"There is interference and noise on the line."	Move the handset **closer** to the base unit, or to a different position.
	Try moving the base unit so that it's **not near other electrical equipment**, such as a television or a computer.
	You'll get the best sound if you place the base unit **as high as possible**. For example, in a two-storey house, the first-floor landing is an ideal place.
"I hear 'beeps' from my handset while I'm on a call."	You may be going **out of range** of the base unit. Move closer or your call may be cut off.
	Check the **Battery Level** symbol on the display. If it's low, recharge the batteries.

48

"The Caller Display feature isn't working."	**You need to subscribe** to the Caller Display feature from your network service provider. You should find contact details on your phone bill.
	The caller may have **withheld** their number by dialling 141. Or they may be calling from a network that does not transmit the caller's number (e.g. it may be an international call.)
"When I try to make a call, I hear Busy tone."	If you're using a iDECT X3i multi-handset system, check another handsets whether or not they are already on a call.
"The volume in the earpiece is low when I'm on a call."	Make sure you're holding the earpiece correctly over your ear.
	Adjust the volume using the **UP▲ /DOWN▼** button.

Intercom and transfer

"I can't transfer a call."	Make sure the other handset is in range of the base unit.
	Make sure you are dialling the correct number for the other handset.

Batteries

"The handset is not functioning even after charging for 8 hours."	Remove the batteries from the handset and wait for a few seconds before replacing them. If the problem persists, replace the batteries.
"The handset's battery pack is running low within an hour or two."	Before you first use the handset, you should have left it on the base unit or charger pod for **24 hours** to charge the batteries fully.
	You may need to **replace the batteries**.
	Check the connection between the base unit and the mains power socket.

"I try to recharge the batteries but I still get a warning that they are low."	You need to **replace the batteries**. To find out how to obtain replacements call the **iDECT Helpline** on **0845 345 9677** from 9:00am to 5:00pm, Monday to Friday (UK only).
	Dispose of used batteries safely never burn them, or put them where they could get punctured.
	Do not use non-rechargeable batteries in your iDECT X3i they may burst, causing damage.

If the fault persists...

Disconnect all other instruments connected to the same line as the iDECT X3i and try to make a call.

Disconnect the base unit from the telephone line and plug a different hone into the master telephone socket. Try making a call. If this works, the line is OK.

If the call does not work, and you are using a **two-way socket adapter**, remove it and plug a telephone directly into the socket. If the call now works, the adapter may be faulty.

If you cannot make a call, the fault may be on the **exchange line**. Contact the service provider (the BT engineers on 151 for UK only, or your cable company).

If you still cannot identify the cause of the problem, contact the **iDECT Helpline** on **0845 345 9677** (UK only).

Cleaning and care

- **Do not clean** any part of your iDECT X3i with benzene, thinner or other solvent chemicals this may cause permanent damage which is not covered by the Guarantee. When necessary, **clean it with a damp cloth.**
- Keep your iDECT X3i away from **hot, humid conditions** or **strong sunlight**, and **don't let it get wet.**
- Every effort has been made to ensure high standards of reliability for your iDECT X3i. However, if something does go wrong, please **do not try to repair it yourself** consult your supplier or the IDECT Helpline.

Declaration of conformity

The DECT cordless phone, identified as iDECT X3i, complies with the essential protective requirements and objectives of:

- EC R&TTE Directive 1999/5/EC
- EC Low Voltage Directive 93/68/EEC

And conforms to the following relevant harmonized standards:

- Radio: EN 301406 (TBR 6)
- EMC: EN 301489
- Safety: EN 60950, EN 41003

The conformity to the requirements is validated by the CE symbol.

NOTE: In compliance with Directive 2002/96/EC, when you purchase a product that comes with the symbol shown on the right, you are required to dispose the electrical and electronic equipment by separate waste collection and you cannot dispose of the product as normal waste. This equipment and all its components, subsystems and consumable materials formed an integral part of this product and when you decide to dispose them, you have to bring them to the local recycling centres for appropriate waste disposal, in compliance with the current regulations. Details about the location of these centres can be obtained from you local authority.

Guarantee and service

The iDECT X3i is guaranteed for 12 months from the date of purchase shown on your sales receipt. This guarantee does not cover any faults or defects caused by accidents, misuse, fair wear and tear, neglect, faults on the telephone line, lightning, tampering with the equipment, or any attempt at adjustment or repair other than through approved agents.

Please keep your sales (till) receipt this is your guarantee. You should also keep the original packaging material.

In the unlikely event that you need to return your iDECT X3i to our Repair Centre while it is under guarantee, there will be a £5 handling charge.

While the unit is under Guarantee

1 Disconnect the base unit from the telephone line and the mains electricity supply.

2 Pack up all parts of your iDECT X3i, using the original packaging. Remember to include the mains adapter.

3 Return the unit to the shop where you bought it, making sure you take your sales receipt.

After the Guarantee has expired

If the unit is no longer under Guarantee, first follow steps **1** and **2** as for repair under Guarantee. Then…

3 Call iDECT Helpline on **0845 345 9677** (for UK only) and ask for a quotation of the repair charge and details of where to send your iDECT X3i for repair.

4 Make sure you include with your iDECT X3i:

■ Your name and address

■ A cheque or postal order for the value of the repair

5 Return your iDECT X3i to the address given by the Service Department.

* This does not affect your statutory rights.

Technical details

Standard	Digital Enhancement Cordless Telecommunication (DECT)
Frequency range	1.88 to 1.9 GHz (bandwidth = 20 MHz)
Channel bandwidth	1.728 MHz
Operating range	Up to 300m outdoors; up to 50m indoors
Operating time	Standby: 100 hours Talking: 10 hours Battery charge time: 24 hours
Temperature range	Operating 0°C to 40°C Storage -20°C to 60°C

Electrical power   HANDSET— 600mAH NiMH 2.4V rechargeable battery pack.

Base UNIT — input 100-240V AC 50-60Hz 0.2A, output 7.5VDC ⎓ 600mA.

CHARGER POD — input 100-240VAC 50-60Hz 0.2A, output 7.5V DC ⎓ 480mA.

Port specification   The ⊖—⎓—⊕ port (connect to the mains power supply) is a SELV port with respect to EN41003.

The ☎ port (connected to the telephone line) is a TNV port with respect to EN41003.
