INTRODUCTION

Congratulations on purchasing your Geemarc GSM CL8400 telephone. This telephone is also hearing aid compatible. It offers many functions such as an alarm, a calendar, SMS text messaging, a phone book, a call record, a speakerphone and speed dial buttons. It has an emergency function in which six numbers can be programmed as emergency contacts. In case of emergency these contacts will be called and SMS messages sent with the flick of just one switch.

The font size on the colour LCD display is large and the buttons on the keypad are easy to see and use. This mobile telephone has a loud ringer and strong vibrating setting. All these features add up to make this a highly suitable telephone for the elderly, hard of hearing or sight people and anyone who simply wants to keep in touch with a great degree of ease.

It is important that you read the instructions below in order to use your Geemarc telephone to its full potential. Keep this user guide in a safe place for future reference.

This guide explains how to use the following telephone:

GSMCL8400

INTRODUCTION

Unpacking the Telephone

When unpacking the telephone, you should find the following in the box:

- 1 GSMCL8400 mobile telephone handset
- 1 Desktop charging unit
- 1 Mains power adaptor
- 1 x Li-Polymer rechargeable battery
- 1 User Guide

DESCRIPTION

LCD Screen Description

The LCD screen is split into three distinct areas:

The icon area. This is found at the top of the screen. This displays the various system icons which help you to use the telephone.

The main area. This is found across the centre of the screen. It displays the following:

- number being dialled
- caller ID information
- phonebook
- menu information
- in standby mode current time, date and service provider name

The soft key area. This is found at the bottom of the screen.

Signal Strength icon

This is always displayed when your telephone is switched on. It shows the current signal strength. More bars indicate more signal strength.

Alarm icon

The alarm has been set to ring at a specified time.

Battery Status icon

This is always displayed when your telephone is switched on. It shows the level of battery charge. More bars indicate more battery charge.

DESCRIPTION

Roaming icon

A roaming call is taking place i.e.international call – outgoing or incoming

SMS icon

A new SMS (text message) has been received

Mute icon

The microphone is temporarily muted during the conversation

SETTING UP

Network Services

To use this mobile telephone you must subscribe to a service from a service provider. Different service providers offer different features (at a variety of charges). This may effect the features made available to you through this mobile telephone.

Passwords

This mobile telephone allows you to set up passwords to help protect your telephone from unauthorized use.

The PIN and PIN2 codes are supplied with your SIM card. The PIN code helps to protect the SIM card from unauthorized use. The PIN2 code is required to access certain services.

The PUK and PUK2 codes may be supplied with the SIM card. If you enter the PIN code incorrectly three times in succession, the PUK will be required. If the codes are not supplied, contact your service provider.

Install SIM card and Battery

Always switch the telephone off and disconnect the charger before removing the battery.

Take care when handling the SIM card. The SIM card and its contacts can be easily damaged by scratches or bending.

SETTING UP

To remove the battery compartment cover, slide the cover in the direction shown and pull it off.

Remove the battery (if battery already inside).

Slide the metal SIM card cover down slightly and then lift up. The SIM card contacts in the phone should now be exposed. Place the SIM card with the gold coloured contacts face down into the SIM card compartment. Place the SIM card cover down and then gently push down and slide upwards until the cover and SIM card are held securely in place. A small click will be audible.

Observe the battery contacts (the gold coloured contacts must face towards the top left).and insert the battery.

Slide the back cover back until it snaps into place.

SETTING UP

Charging the battery

Charging via the Mini USB Port

Plug the charger into a wall socket.

Connect the lead from the charger into the the Mini USB port on the bottom of the telephone (pull back the protective flap first). During charging, the battery icon

starts to fill.

Charging via the Charging Unit

Plug the charger into a wall socket.

Connect the lead from the charger into the the Mini USB port on the charging unit.

Place the mobile telephone onto the charging unit.

SETTING UP

Note: Only use batteries and chargers supplied with the telephone. The guarantee will be invalid if an unapproved cable is used. Keep the battery contacts clean and free of dirt. Try and avoid removing the battery as this could short circuit the battery.

If the battery is completely discharged, it may take a few seconds before the charging indicator appears on the display or before any calls can be made.

Before the handset is first used, the battery must be charged for a minimum of 4 hours.

Switching On/Off

Press  for 3 seconds or longer to switch the telephone on.

WELCOME will be displayed on the LCD (dependant on settings).

If no SIM card has been inserted, **LIMITED SERVICE** will be displayed. Only emergency calls can be made until the SIM has been inserted.

If this is the first time the phone has been switched on with the SIM inserted, you will be prompted to enter the time and the date (use the numeric keypad).

SETTING UP

Press  again for 3 seconds to switch the telephone off. **GOODBYE** will be displayed then the display disappears (dependant on settings).

Battery Use

The  icon is continuously displayed at the top right corner of the LCD display. The icon indicates the level of battery power. The more bars displayed, the more power available.

When the battery charge is low, a warning message will be displayed '**CHARGE THE BATTERY**'. The back lighting and certain other functions may stop working. When the battery is too weak for the telephone to operate, the handset will automatically switch off. Battery talk and standby times are subject to change. Replace the battery when the battery power has deteriorated noticeably (requires charging more frequently).

USING THE TELEPHONE

Standby Mode

When the telephone is ready for use and you have not entered any characters, the telephone is in standby mode. You can set the telephone to standby mode by

pressing .

Making a Call

Flip open the cover and dial the number on the keypad.

Press **DELETE** soft key to delete an incorrect digit

Press , the number is automatically dialled

To end the call simply press 

To place an international call you need to press **+** before the country code. Simply, press ***** key twice. Some foreign telephone networks have extension lines that cannot be dialled as dial-through, but need to be entered by the keypad. To dial these directly, press ***** quickly three times in a row after the telephone number. The **p** character will appear and then you can enter the extension.

USING THE TELEPHONE

Making a Call from the Call Record

You can find numbers dialled, received or missed in the call record.

Press

to enter the call record

Use  or  to scroll through the lists available

Press **ACCEPT** soft key to select the required list

Use  or  to scroll through the telephone numbers

On finding the desired number, press , the number is automatically dialled

To end the call simply press

Making a Call from the Phone Book

If you have stored numbers in the phone book, you can dial numbers using the phone book.

Press **Menu** to enter the phonebook

Use  or  to scroll through contact names in the phonebook

USING THE TELEPHONE

On finding the desired name, press , the number is automatically dialled

To end the call simply press 

Making a Call using Quick Dial

If you have stored numbers in the quick dial locations, press either M1, M2 or M3 (dependant on who you wish to ring). The chosen telephone number will be dialled automatically.

Making a Call from the Dialed Numbers List

Press  to display the outgoing call list

Use  or  to scroll through the list and find the desired number

Press  again, the number is automatically dialled

USING THE TELEPHONE

Receiving a Call

When an incoming call is received the telephone rings and the small white LED will flash. If the Caller ID service is activated, the caller's telephone number will be displayed. If this caller's number is stored in the Phonebook, the associated name will displayed

Press  to answer

To end the call simply press  or flip the cover closed

Rejecting a Call

To reject an incoming call, simply press  or soft key **REJECT**

Switch Off Alerts

You can temporarily switch off all of the alerts and vibrations for an incoming call.

On receiving an incoming call, press **OPTION** soft key

Press **RINGER OFF** soft key

USING THE TELEPHONE

Options During a Call

You can use a variety of functions during a call by pressing the **OPTION** soft key.

Mute Function

If you wish, you can speak privately to someone else in the room without your caller overhearing. You will still be able to hear the caller but they cannot hear you during the mute operation.

During a call, press **OPTION** soft key

Press **ACCEPT** soft key in order to select **MUTE**

To switch mute off, simply do the same again.
Press **OPTION** soft key then press **ACCEPT** soft key in order to select **UNMUTE**

Handsfree Function

You can turn on the speakerphone built into the telephone during a call. In this mode there is no need to hold the handset. You will hear the third party through the speaker and the microphone will pick up your voice.

During a call, press **OPTION** soft key

Use  or  to scroll through the menu to select **HANDSFREE**

USING THE TELEPHONE

Press **ACCEPT** soft key

To switch handsfree off, simply do the same again.
Press **OPTION** scroll through the list to find
HANDSFREE OFF and press the **ACCEPT** soft
key

Note: Before putting the handset to your ear, please ensure you have switched the speakerphone off.

Disconnect Function

You can end the current call.

During a call, press **OPTION** soft key

Use  or  to scroll through the menu to
select **DISCONNECT**

Press **ACCEPT** soft key to select

Main Menu Function

You can enter the main menu during a call. This enables you to use most of the main menu functions during the call e.g. send an SMS message.

During a call, press **OPTION** soft key

Use  or  to scroll through the menu to
select

USING THE TELEPHONE

MAIN MENU

Press **ACCEPT** soft key to select. The Main Menu screen will be displayed

Receiving Volume

During a conversation, the **V+** and **V-** buttons found on the left side, adjust the ear piece volume level, there are 8 volume levels. The **AMP** button, found on the right side, gives an extra 25dB boost.

You can adjust the Tone by pressing the T control on the left side of the phone repeatedly until you find the correct tone level for your hearing requirements. There are 5 tone levels covering tone control of 10 dB

Ringer Volume

When the phone rings with an incoming call, you can adjust the ringer volume by pressing **V+** or **V-**. This will override the ringer volume setting in the profile currently being used.

Call Timer

Your handset automatically times the duration of every external call. The time is shown during the call and for a few seconds after the call has ended.

Send a Text Message

A text message using this telephone can contain up to 160 characters. This figure includes spaces.

Press **MENU** soft key to activate the menu

Press **ACCEPT** soft key to select **SHORT MESSAGE**

Or

Text Message Settings

Service Centres distribute SMS messages. Your mobile telephone must have the telephone number for the service centre programmed into memory. Generally, on receiving your telephone this will have already been set up by your service provider. If it has not, then you can set it up yourself

SMS Service Centre

Press **MENU** soft key to activate the menu

Press **ACCEPT** soft key to select **SHORT**

SMS

MESSAGE

Use  or  to scroll through the menu to select
MESSAGE SETUP

Press **ACCEPT** soft key to select

Now select **SERVICE CENTRE** and enter the required number using the numeric keypad.

Protocol Type

Text, fax and email are available.

Validity

You can stipulate how long an attempt at delivering a message should be

Status Report

You can opt to receive a message confirming that a message you sent has been delivered successfully.

Reply Path

If you activate this feature, when you reply to a message, the cost of sending it is charged to the recipient's account instead of your own.

Storage Media

If you select **SIM PREFERRED**, when you receive a new message it will be stored on the SIM card by default. When the SIM card memory is full new messages will be stored in the phone.

Storage Status

A useful option is to request to see how much memory is occupied and how much is free on both the SIM card and the telephone e.g,  17/40,  2/40.

Broadcast Messages

This telephone supports the broadcast messages i.e. information services from your service provider

Press **MENU** soft key to activate the menu

Press **ACCEPT** soft key to select **SHORT MESSAGE**

Use  or  to scroll through the menu to select **BROADCAST MSG**

Press **ACCEPT** soft key to select

You can select the language of broadcast together with topic preference.

VOICE MAIL

Vicemail Number Setting

The voicemail function allows you to listen to any voicemail messages people may have left for you.

The voice mailbox is a network service to which you may need to subscribe. Contact your service provider if in doubt.

If your service provider does give you access to voice mail, the telephone number used to access the voice mail system will normally be set up on your telephone. However, if it is not, it can be set up as follows.

Press **MENU** soft key to activate the menu

Press **ACCEPT** soft key to select
SHORT MESSAGE

Use  or  to scroll through the menu to select
VOICEMAIL

Press **ACCEPT** soft key to select

Use  or  to scroll through the menu to select
NUMBER

Press **ACCEPT** soft key to select

Enter the mailbox number using the numeric keypad

Press **ACCEPT** soft key to select

VOICE MAIL

Listen to Voicemail

If you have missed a call, you will receive a message on the phone's display, **1 MISSED CALL**. Press **SELECT**, you will see a list of all missed calls in the Call Record.

Press **MENU** soft key to activate the menu

Press **ACCEPT** soft key to select **SHORT MESSAGE**

Use  or  to scroll through the menu to select **VOICEMAIL**

Press **ACCEPT** soft key to select

Press **ACCEPT** soft key to select **LISTEN TO MSG**

Or

Simply press **1**. You will be connected to voice mail and can listen to your messages.

PHONE BOOK

Telephone numbers and names can be stored in the phone book. This is held both on the SIM and in the phone memory. It allows you to store frequently used numbers so that you can easily make a call without having to remember or enter the telephone number. You can search and recall numbers in order to make a call, send a message or use an entry as an emergency contact. The phone book can contain at least 40 entries. If you try to add a new entry when all the memory is filled, a warning message will be displayed. You will need to delete an existing entry in order to add the new telephone number. The contacts saved in the SIM card memory are indicated by **SIM**. The advantage of saving to SIM means you can transfer the information to another telephone.

Create a Phone Book Entry

Press **MENU** soft key to activate the menu

Use  and  to scroll through the menu to select **PHONEBOOK**

Press **ACCEPT** soft key to select

Use  and  to scroll through the menu to select **CREATE**

Press **ACCEPT** soft key to select

PHONE BOOK

Use  and  to scroll through the menu to select memory location, either **SAVE TO SIM** or **SAVE TO PHONE**

Press **ACCEPT** soft key to select

Press **EDIT** soft key

Enter the name using the numeric keypad

Press **ACCEPT** soft key to confirm

Use  to move to the number field

Press **EDIT** soft key

Enter the number using the numeric keypad – up to 41 digits allowed (always include the local area code)

Press **SAVE** soft key to confirm

Press **SAVE** soft key. **DONE!** will be displayed

PHONE BOOK

The numeric keypad also has characters printed on the keys. These characters are used for entering text for the purposes of phonebook entry and modification, SMS text writing and searching for an entry in the phonebook. Press each key the relevant number of times to get the letter you need e..g. to get the letter J, press the 5 key once, to get the letter S, press the 7 key four times in quick succession.

To move on to the next letter, wait a few seconds and the cursor will appear | after the last letter you entered. You may now enter the next letter. To switch between upper and lower case use the  key. You can also switch to numbers using  key. The input mode will be indicated in the top left of the LCD display.

Press 0 to insert a space.

Press the **DELETE** soft key to delete the last character typed in while entering a number or a name. Press and hold the **DELETE** soft key to clear the screen.

PHONE BOOK

Character Map

Key	Characters in the displayed order

Use  and  to scroll through the menu to select **SETTINGS**

HANDSET SETTINGS

Press **ACCEPT** soft key to select

Use  and  to scroll through the menu to select **FACTORY DEFAULT**

Press **ACCEPT** soft key to select

You will be asked to enter the current phone code (0000). Type it in using the numeric keypad.

Press **ACCEPT** soft key

SOS Function

In an emergency, you can move the **SOS** switch to the **ON** position for help.

If you have preset an SOS text message and set the SMS **RECEIVER** (generally another mobile phone), once you move the **SOS** switch to **ON**, the phone will send the SOS text message to the receiver.

The SOS message will be sent before starting to call the numbers on the **SOS list**. Up to 6 numbers can be preset on the **SOS list** (please check that this service is available from your service provider). The phone will dial numbers on this SOS list automatically one by one. If a busy tone is detected or a call is aborted by user, the next number will be dialled immediately. The phone will dial these numbers until the handset is powered off.

If you want to quit the SOS mode, move the switch to **SOS OFF**.

Note: When you move the SOS switch ON, you cannot turn the telephone OFF. You must switch the SOS mode OFF before turning the phone off.

SOS

SOS Number Settings

You can set up to 6 SOS numbers.

Press **MENU** soft key to activate the menu

Use  and  to scroll through the menu to select

TROUBLESHOOTING

Telephone cannot be switched on

- Check battery is inserted and check that it is inserted correctly

Nothing appears on the display

- Check the handset is switched on
- Check the battery and SIM are inserted correctly

Display is locked when the telephone is switched on

- Enter the PUK to unlock the SIM

No signal icon is displayed

- There is no network connection. Move around to try and get to an area where there may be coverage
- Contact your service provider

Message to say that a function is not possible

- Your service provider might not provide the function in question or you may need to subscribe to that service. Contact the service provider.

No display during the charging process

- The battery charge is very low. Wait a few minutes.

“Insert Sim” or “Limited Service” message is displayed

- Ensure the SIM is inserted correctly

The battery is discharged quickly or cannot be charged at all.

- Charge the battery for 4 hours
- Place the phone correctly in the charging unit or connect the charging unit properly. Clean the contact surfaces on the mobile phone and charging unit with a soft, dry cloth.
- Try a new battery

TROUBLESHOOTING

Failure to link to the network

- The signal is too weak, or there may be some radio interference
- Is the SIM card installed incorrectly or damaged? If the SIM card is damaged, please ask your service provider for a replacement.

Cannot make a Call

- Is the SIM card registered to the network
- Is the bar outgoing calls feature enabled
- There may be a problem with the network, call your service provider
- Check the service provider number, local area number or NMC number (see Handset Settings)

Cannot answer a call:

- Is the bar incoming calls feature enabled
- Is the call diverting function enabled

The keys appear to be locked

- Power the phone off and then on

Caller Number is not displayed

- Ensure you have subscribed to the Caller ID service. Contact your service provider
- The caller may have withheld their details
- Let the phone ring a few times as there may be a delay in receiving the Caller ID information

Any problems not referred to above

- Check through the User Guide
- Power off and then on again. Check to see if the problem persists

SAFETY INFORMATION

General

Only use the power supply included with the product.

Only use the approved rechargeable battery supplied.

Do not open the handset (except to replace the handset batteries) or base. Contact the helpline for all repairs.

Never dispose of batteries in a fire. There is a serious risk of explosion and/ or the release of toxic chemicals.

If you are sure you are not going to use the telephone for over a month, remove the battery

Cleaning

Clean the telephone with a soft cloth. Keep the base and handset charging contacts clean. Never use polishes or cleaning agents - they could damage the finish or the electrics inside.

Environmental

Do not expose to direct sunlight.

Always ensure there is a free flow of air over the surfaces of the telephone.

Do not place any part of your product in water and do not use it in damp or humid conditions e.g. bathrooms.

Do not expose your product to fire or other hazardous conditions.

The telephone is designed for working within a temperature range of -20°C to 60°C.

SAFETY INFORMATION

Usage

In summary, read these simple guidelines. Not following them may be dangerous or illegal.

SWITCH ON SAFELY

Do not switch the device on when wireless phone use is prohibited or when it may cause interference or danger.

ROAD SAFETY COMES FIRST

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

INTERFERENCE

All wireless devices may be susceptible to interference. This could affect performance.

SWITCH OFF IN HOSPITALS

Follow any restrictions. Switch the device off near medical equipment.

SWITCH OFF IN AIRCRAFT

Follow any restrictions. Wireless devices can cause interference in aircraft.

SWITCH OFF WHEN REFUELLING

Do not use the device at a refuelling point. Do not use near fuel or chemicals.

SWITCH OFF NEAR BLASTING

Follow any restrictions. Do not use the device where blasting is in progress.

USE SENSIBLY

Use only in the normal position as explained in the product documentation.

BACK-UP COPIES

Remember to make back-up copies or keep a written record of all-important information.

CHARGING

Do not use the telephone during charging

HEARING AID INFORMATION

Some phones are measured for compatibility with hearing aids. If the box for your particular model has "Rated for Hearing Aids" printed on it, the following explanation applies. When some mobile phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate. The wireless telephone industry has developed ratings for some of their mobile phones, to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label on the box. The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

NETWORK SERVICES

To use the phone you must have service from a wireless service provider. Many of the features in this device depend on features in the wireless network to function. These network services may not be available on all networks or you may have to make specific arrangements with your service provider before you can utilize network services. Your service provider may need to give you additional instructions for their use and explain what charges will apply. Some networks may have limitations that affect how you can use network services. For instance, some networks may not support all language-dependent characters and services.

Your service provider may have requested that certain features be disabled or not activated in your device. If so, they will not appear on your device menu. Your device may also have been specially configured. This configuration may include changes in menu names, menu order and icons. Contact your service provider for more information.

GUARANTEE

From the moment your Geemarc product is purchased, Geemarc guarantee it for the period of one year. During this time, all repairs or replacements (at our discretion) are free of charge. Should you experience a problem then contact our help line or visit our website at www.geemarc.com. The guarantee does not cover accidents, negligence or breakages to any parts. The product must not be tampered with or taken apart by anyone who is not an authorized Geemarc representative. The Geemarc guarantee in no way limits your legal rights.

IMPORTANT: YOUR RECEIPT IS PART OF YOUR GUARANTEE AND MUST BE RETAINED AND PRODUCED IN THE EVENT OF A WARRANTY CLAIM.
