

# swissvoice L7

cordless phone\*

\*WITH OR WITHOUT ANSWERING MACHINE

## A marriage of personality and functionality makes for a peerless telephone experience

### 1. Swiss quality

Manufactured to exacting Swiss standards of quality, the L7 combines robust construction with high-quality components for a product that's built to last.

### 2. Attention to detail

Careful consideration went into every detail, right down to the custom interface, screen icons and typeface. A subtle branding touch underscores the attention to aesthetics, while the phone's novel ringtones are as bold as its angular, L-shaped design.

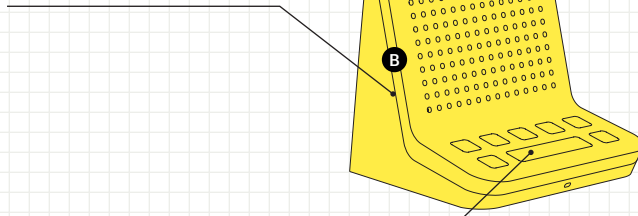

### 3. Unique features

We included a speakerphone in both the handset and the base station, meaning calls can be taken even when the handset is out of reach. Additionally, it features a simple one-button, push-to-talk intercom system that permits the handset (or multiple handsets) and base station to function like walkie-talkies.

# Distinct functions:

## Base station

- Speakerphone
- Answer calls hands-free
- Intercom
- Answering machine\*

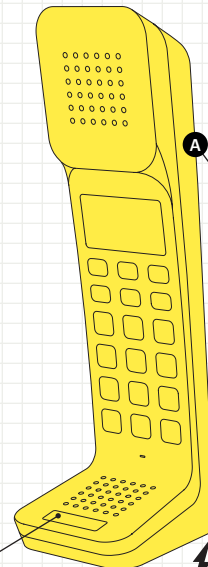

## Push-to-talk intercom

- Press and hold: broadcast voice to all units like a wakie-talkie
- Short press: call other units to initiate private 2-way intercom

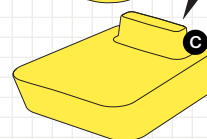

## Handset

- Speakerphone
- Intercom
- Answering machine\*

## Charging dock

- Rests anywhere near a power outlet

## Call Management

- Caller ID supported
- 100 entries in contacts list
- Phonebook transfer
- Redial list of 20 entries
- Recall list of 50 entries
- Internal and external call transfer
- Internal and external conference
- Up to 9 languages per product
- Loudspeaker volume adjustable (8 levels)
- Hearing aid compatible

## Primary Features

- Push-to-Talk intercom between handsets and/or base station
- Hands-free speakerphone on handset and base station with rich bass sound
- Answer calls directly on base station
- High quality loudspeaker & microphone components
- Fulleco technology for reduced emissions and power use
- Zero emission in standby mode (not supported in US version)
- Custom designed typeface & icons
- Answering machine accessible from base or handset

## Comfort Features

- Remote base for a free location at home
- Base with powerful speakers and microphones
- 11 polyphonic ringtones in the handset
- 2 monophonic ringtones in the base station
- Ringer volume adjustable (5 levels)
