Hush Smart
Baby Monitor

Hush

The new Hush Smart Baby Monitor works with smartphones, tablets and any internet connected device. Night vision and remote camera operation mean that no matter where you are in the world you can see, hear, talk and even take a photo of your baby.

Here are the key features and benefits of the Hush Smart Phone enabled Monitor:

Cross Platform capability
Flexible, it's compatible with Apple iOS, Android, Windows and other devices. Simply download the app from the relevant App Store

Wi-Fi with Passkey Encryption
The monitor connects to your home Wi-Fi network. With passkey encryption, you can be assured only those in your network will be able to access the camera

Night Vision
See your baby when it's dark up to 15m away. You can use the controls to adjust the brightness and contrast on your Smartphone

Camera movement
Improve your view using the controls to move the camera left, right, up and down, giving you a complete view of your nursery

Take a photo
Take and share a photo of your baby with family and friends at the touch of a button

Hear and talk back
You can listen to your baby and use the Talk button when you think baby wants to hear your voice

You're never too far away
Passkey encryption allows you to see your baby when you're outside your home network. So even if you're on the other side of the world, you'll never be too far away.

Limited time access
You could let a babysitter use their own phone to see the baby while they're in your home, but make the access expire the next day.
