

The wireless camera that stores everything in the cloud free for 7 days

Tap into your home life from anywhere with HomeMonitor HD - connecting you to what matters from wherever you are. Super simple to set up and use, just connect a camera, create an account and you're viewing your camera live.

No technical knowhow, no fiddling with your router settings, no cabling everywhere or bulky scary equipment – HomeMonitor is just a quick and simple way to watch whatever you want.

Combining simple wireless internet cameras and your own secure online account, HomeMonitor allows you to watch live or see recorded clips from any computer, tablet or smartphone - keeping you in touch with what matters most. Each HomeMonitor camera records the last 7 days of clips free online in your account, so any clips are safely stored on secure cloud servers letting you access them from anywhere. No subscriptions, no ongoing fees.

The possibilities are endless

Easy home security

With easy setup and 'no-fuss' remote access, HomeMonitor™ is perfect for watching over your home when you can't be there. The intuitive system will instantly record a video clip and alert you each time someone enters your front door so whether you are down the street or across the globe you will always know your home is safe.

Protect family members

Looking after vulnerable relatives can be a real worry, especially during the times that you can't be there or have to leave them in the care of others. With HomeMonitor™ you can always have an eye and ear on your family member to ensure their safety and wellbeing.

Watch your baby or child

It's hard to always be there, so HomeMonitor™ can make being a mum or dad easier. With 24/7 access to your little one from wherever you may be, plus the ability to capture videos, you will never miss a moment.

Monitor your pet

Having a pet at home is a joy, however having to leave them when you are out of the house can be a real concern. With HomeMonitor™ you can stay in touch with your pooch or cat and know exactly how they are, in real-time, from wherever you are.
