Comfort Bluetooth Headset DA-579BT

Latest Bluetooth Technology for professional use.

The FreeMate DA-579BT is the new DASAN ELECTRON cordless comfort Bluetooth headset for high-end requirements.

When mobile phones replace the ordinary phones at the office, comfortable and ergonomic solutions are needed for those who spend long hours on the phone. The FreeMate DA-579BT is such a solution and meets these requirements. It is first choice in sound quality, wearing comfort and durability.

Ready for VoIP. As an accessory there is an USB Bluetooth dongle for PC available. With this dongle you can connect the FreeMate DA-579BT to a computer and use it as an audio device for VoIP applications for example Skype.

Ready for Multi-pairing. The FreeMate DA-579BT can be paired with more than one Bluetooth device, e.g. with your office mobile phone and your PC. So you are able to use it e.g. for incoming calls with your mobile phone and for outgoing calls with your computer. Although you can use it with your GSM mobile phone when leaving the office.

The multi-talent among the multipurpose amplifiers with a convincing cost-performance ratio.

DA-475EU

Related to the European Union Guideline 2003/10/EG "Noise protection on working places" with a noise limitation of 85dB(A)

DA-475S

Multipurpose amplifier for direct connection of a headset on analogue port. (Single-line)

Feature :

- 85dB(A) speaker limitation (DA-475EU)
- Volume control
- Headset/Handset selection switch
- Microphone mute switch
- Busy indicator
- Headset hanger
- Battery empty announcement
- Audio jack for external recording
- Extreme low battery consumption (2*AA batteries)
- Optionally AC/DC power adapter available
- Adjustment possibilities for almost all telephone and headset types

DA-475S

DA-202 Headset Telephone

The headset telephone FreeMate DA-202 is a completely independent analogue headset telephone which relieves your working day.

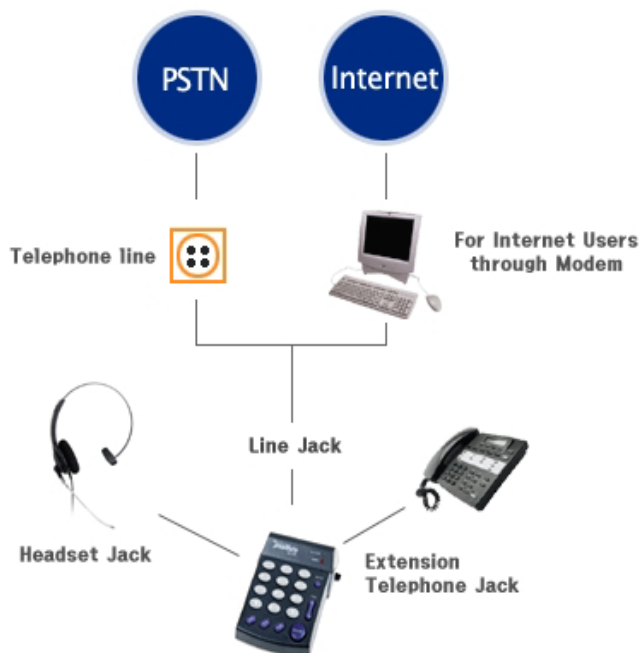

DA-202

DAX-202

Both headset and handset use

Full hands-free productions with headsets.
With unique design, you can talk on the phone, take note and works with PC simultaneously.

High quality receiving sound by adopting AMS IC chip

Most endurable On/Off switch approved by 50,000 times switching

Feature :

- Receiving volume control
- Transmission volume control
- Tone controller to quality low and high sound
- Mute switch for temporary call suspension
- Last number redial
- Flash
- Repeat dial
- Simultaneous call selection
- Extension jack to the other phone and modem
- Recording jack for external recorder
- LED light in use
- Mute switch (LED light)

DA-203 Headset Telephone with display

The headset telephone FreeMate DA-203 is a completely independent analogue headset telephone which relieves your working day.

Make a phone, make notes and work at the same time at your PC ;
with the FreeMate DA-203 no problem!

High quality sound owing to intergrated AMS IC chip!
Extremely durable on/off button on 50,000 cycles tested!

Feature :

- Volume control
- Sound control for the regulation of high and deep tones
- Microphoe mute switch
- Re-dialling of the last called number
- Flash key for internal call forwarding on PBX's
- Call selection
- Interface for headset, handset an additional telephone or modem
- Interface for external recording
- Inline indicator
- Recording of the last 60 arriving and 10 outgoing call numbers
- Recall function
- Date and time announcement
- Announcement of the last called number
- Announcement of the receiving call number (Caller ID)
- Storage of date and time of the received calls
- Headset hanger
- 3*AAA batteries required
- Handset optionally
- Individual headset optionally

DA-207 Headset Telephone

The headset telephone FreeMate DA-207 is a completely independent analogue headset telephone which relieves your working day.

DA-207

Specially designed for telemarketer working for all day long to feel soft touch of dial pad with adapting computer key-pad concept. Also, no need separate training cord since there are two headset jacks for agent and supervisor

Full hands-free productons with headsets. With unique design, you can talk on the phone, take note and works with PC simultaneously.

High quality receiving sound by adopting AMS IC chip

Most enduralbe On/Off switch approved by 50,000 times switching

Feature :

- Recording jack for external recorder
- Mute switch (LED light) for agent or supervisor
- Flash / -. Repeat dial / -. LED light in use

DAH-207

Automatic/Manual call receiving selection switch

DA-201 Handset Amplifier

The FreeMate DA-201 handset amplifier increases the speaker volume up to 50%!

The FreeMate DA-201 is ideally for very loud environments,
bad line qualities and particularly for deaf people.

The FreeMate DA-201 is compatible with
almost all telephones present on the market and easy to install!

DA-201

Feature :

- Variable volume control
- Easy installation between telephone and handset
- Battery durability up to 4,000 hours
- Adjustment switches for most telephones
- Battery change announcement

Headset/Handset connection box DA-271

The multipurpose connection box for an easy headset connection on telephones.

DA-271

Flexibility :

The FreeMate DA-271/DA-271EU headset connection box makes it easy to connect up to 2 headsets with RJ plugs (4/4 western plug) on one telephone.

By the automatic microphone +/- direction installation of a headset on individual telephone is absolutely uncomplicated. You can select at any time, also during a telephone call, between handset and headset.

Compatibility :

The FreeMate DA-271/DA-271EU headset/handset connection box is compatible with most headsets and telephones, with RJ plug (4/4 Western plug).

Security :

The FreeMate DA-271EU headset/handset connection box corresponds to the European Union guideline 2003/10/EG "Noise protection on working place" with a noise limitation of 85dB(A) and contributes thus to an active health prevention at telephone working places.

Efficiency :

The efficiency of the FreeMate DA-271/DA-271EU headset/handset connection box unusual for this price class. Features you do not even find in high-priced amplifier boxes of other manufacturer are integrated by DASAN ELECTRON into the headset/handset connection box FreeMate DA-271/DA-271EU, and this to an unbeatable cost-performance ratio.

Feature :

- Headset/Handset switch
- Independent adjustment by automatic microphone +/- termination
- Headset microphone adjustment for an optimal speech quality
- 2 headset ports, e.g. for training purposes or for "mornitoring"
- Microphone mute alternatively for headset 1, headset 2 or both
- Audio plug for external recording
- Headset hanger
- No batteries or power supply necessary

DA-171

Headset/Handset selection switch

On-Line-Indicator DI-10S / DI-10L

NEVER MORE DISTURBED WHEN TELEPHONING!

**An ingenious and useful accessories for your telephone working
places equipped with headsets!**

Now you can make telephone calls without to being disturbed!
