

Quick Start

**Nighthawk
AC1900 WiFi
LTE Modem Router**
Model R7100LG

NETGEAR®

Package Contents

1. Attach and Position the Antennas

Attach and tighten the antennas on the threaded antenna posts.
Position the antennas as shown.

2. Insert a Micro SIM Card

IMPORTANT: Make sure that the modem router is powered off before inserting a micro SIM card.

Insert the micro SIM card into the SIM slot on the back of the modem router. The modem router does not support SIM hot-swapping. If you want to change the micro SIM card, power off the modem router before changing the micro SIM card.

You can also connect your modem router to a cable or DSL modem. For more information, see the *Do More* booklet or the user manual. The user manual is available online at downloadcenter.netgear.com.

3. Plug In Your Modem Router

Connect the modem router to a power source.

The modem router's Power LED  lights amber and then turns white when the modem router is ready.

4. Connect to the Internet

You can either use an Ethernet cable or connect with WiFi to the modem router. To connect with WiFi:

Make sure that the modem router's WiFi LED  is lit. Find the modem router's preassigned WiFi network name and password on the label on the modem router.

Open the WiFi connection manager on your WiFi-enabled computer or mobile device find the modem router's WiFi network name, and use the modem router's password to connect.

Launch a web browser. If the NETGEAR installation assistant does not display, visit www.routerlogin.net. If a login window opens, enter **admin** for the user name and **password** for the password.

Follow the NETGEAR installation assistant. The 3G/4G LED lights when the installation is complete.

5. Check the 3G/4G LED on Your Modem Router

The 3G/4G LED on your modem router indicates your modem router's mobile broadband signal strength.

For more information about the 3G/4G LED behavior, see the *Do More* booklet or the user manual, which is available online at downloadcenter.netgear.com.
